EDUCATION

University at Buffalo, The State University of New York

Expected May 2026

3.98 GPA, Bachelor of Science, Computer Science

Presidential Scholar, Honors College, Leadership House, Dean's List

WORK EXPERIENCE

Software Engineer Intern — Institute for Artificial Intelligence & Data Science, New York, USA December 2023 - Present

- Develop **MLModelScope**, an open-source platform for fair evaluation of ML models across frameworks & hardware.
- Implement ML *modalities* with **ReactJS** & **Storybook**, updated **Go** & **Flask** APIs, and incorporated ML models into the **Python** backend.
- Optimized API agent distribution to reduce processing times by 25% and increased models portfolio by 5x.

Researcher — Cacti Lab, University at Buffalo

September 2023 - December 2023

- Contributed to research on *Linux-asahi* project, focusing on identifying & addressing vulnerabilities to improve kernel security.
- Explored **Rust**'s capabilities for low-level programming and its potential applications in operating system design.
- Conducted research aligned with Georgia Tech's CS3210 Design-OS course, developing a deep understanding of OS concepts such as process management, memory management, and concurrency.

Full-stack Web Developer — Holistic Kids Foundation

April 2023 - August 2023

- Designed & developed *Sinna*, a web platform for children with visual impairments to assist with daily tasks.
- Initiated the project from the ground up using the **MERN** stack implementing a multi-role interface for diverse user needs.
- Developed a functional prototype that was tested by 100 children & their families, demonstrating an 88% user satisfaction rate.

PROJECTS

Attentive, AI-powered video-chat app:

June 2022 - August 2022

- Developed a video-chat app with MongoDB, Express.js, React.js, & Node.js, leveraging Socket.IO & PeerJS for real-time calls.
- Integrated facial recognition using **face-api.js** to automate attendance tracking during online classes at regular frequencies.
- Implemented security features to restrict access to virtual classrooms, effectively preventing Zoom bombing.

RoleEase, Role-assigning Discord Bot:

September 2021

- Developed a Discord bot to automate role assignment in servers, a secure alternative to reaction-based role assignment bots.
- Designed the **Python** bot using **Discord API**, **Openpyxl**, and **Asyncio**, adding functionality to extract user data from Excel.
- Adopted by multiple school clubs, the bot impacted 10+ servers and benefited 2k+ users by reducing manual workload.
